

Surface Plate/Gauges

A Surface Plate provides a flat surface for rear roller adjustments, checking bedknife clearances and detecting frame alignment problems. Made of machined aluminum and built-in parallel bar for fast, easy adjustment to the rear roller.

+ FACT: With today's shorter heights of cut, use of height gauges and ensuring squareness of the reel and frame are more critical than ever!

Model 365 Back Lapper

Quickly sharpens and hones reels and bedknives between major sharpening. Connects easily to most reel mowers and can sharpen gang mowers while still connected.

+ FACT: Lapping is a preventative process, not a resharpening process.

Model 620 Bedknife Facing Tool

Improve cut quality between major sharpenings. The Model 620 Bedknife Facer Tool comes with a grinding disc for effective grinding results, and an adjustable front-angle feature which allows for easy access to the front face of a knife.

+ FACT: Using a bedknife tool creates and edge faster and more effectively over manual methods.

Model 386 Hole Cutter Sharpener

Easy-to-use sharpener quickly puts a razor sharp edge on your hole cutters in a matter of seconds. With a light touch, you get a microscopic honing of your hole cutter to bring it back to better than its original sharpness. Your hole cutter will be easier to use and this sharpening will prevent root damage on your greens, evident by those unsightly brown rings.

+ FACT: Dull cup cutters can tear the root system of plugs, causing rings when being replaced.

Model 450 Rotary Blade Grinder

The 450 Rotary Blade Grinder makes it possible to grind any angle desired with an easy-to-use, adjustable blade guide to rest the blade on. This rugged unit can handle all rotary blades, including mulching blades, and will quickly and efficiently sharpen to a crisp cutting edge. The specially formulated 1" x 8", 24 grit grinding wheel aggressively removes metal, yet provides a cool cut to minimize your grind time on right and left handed rotary blades.

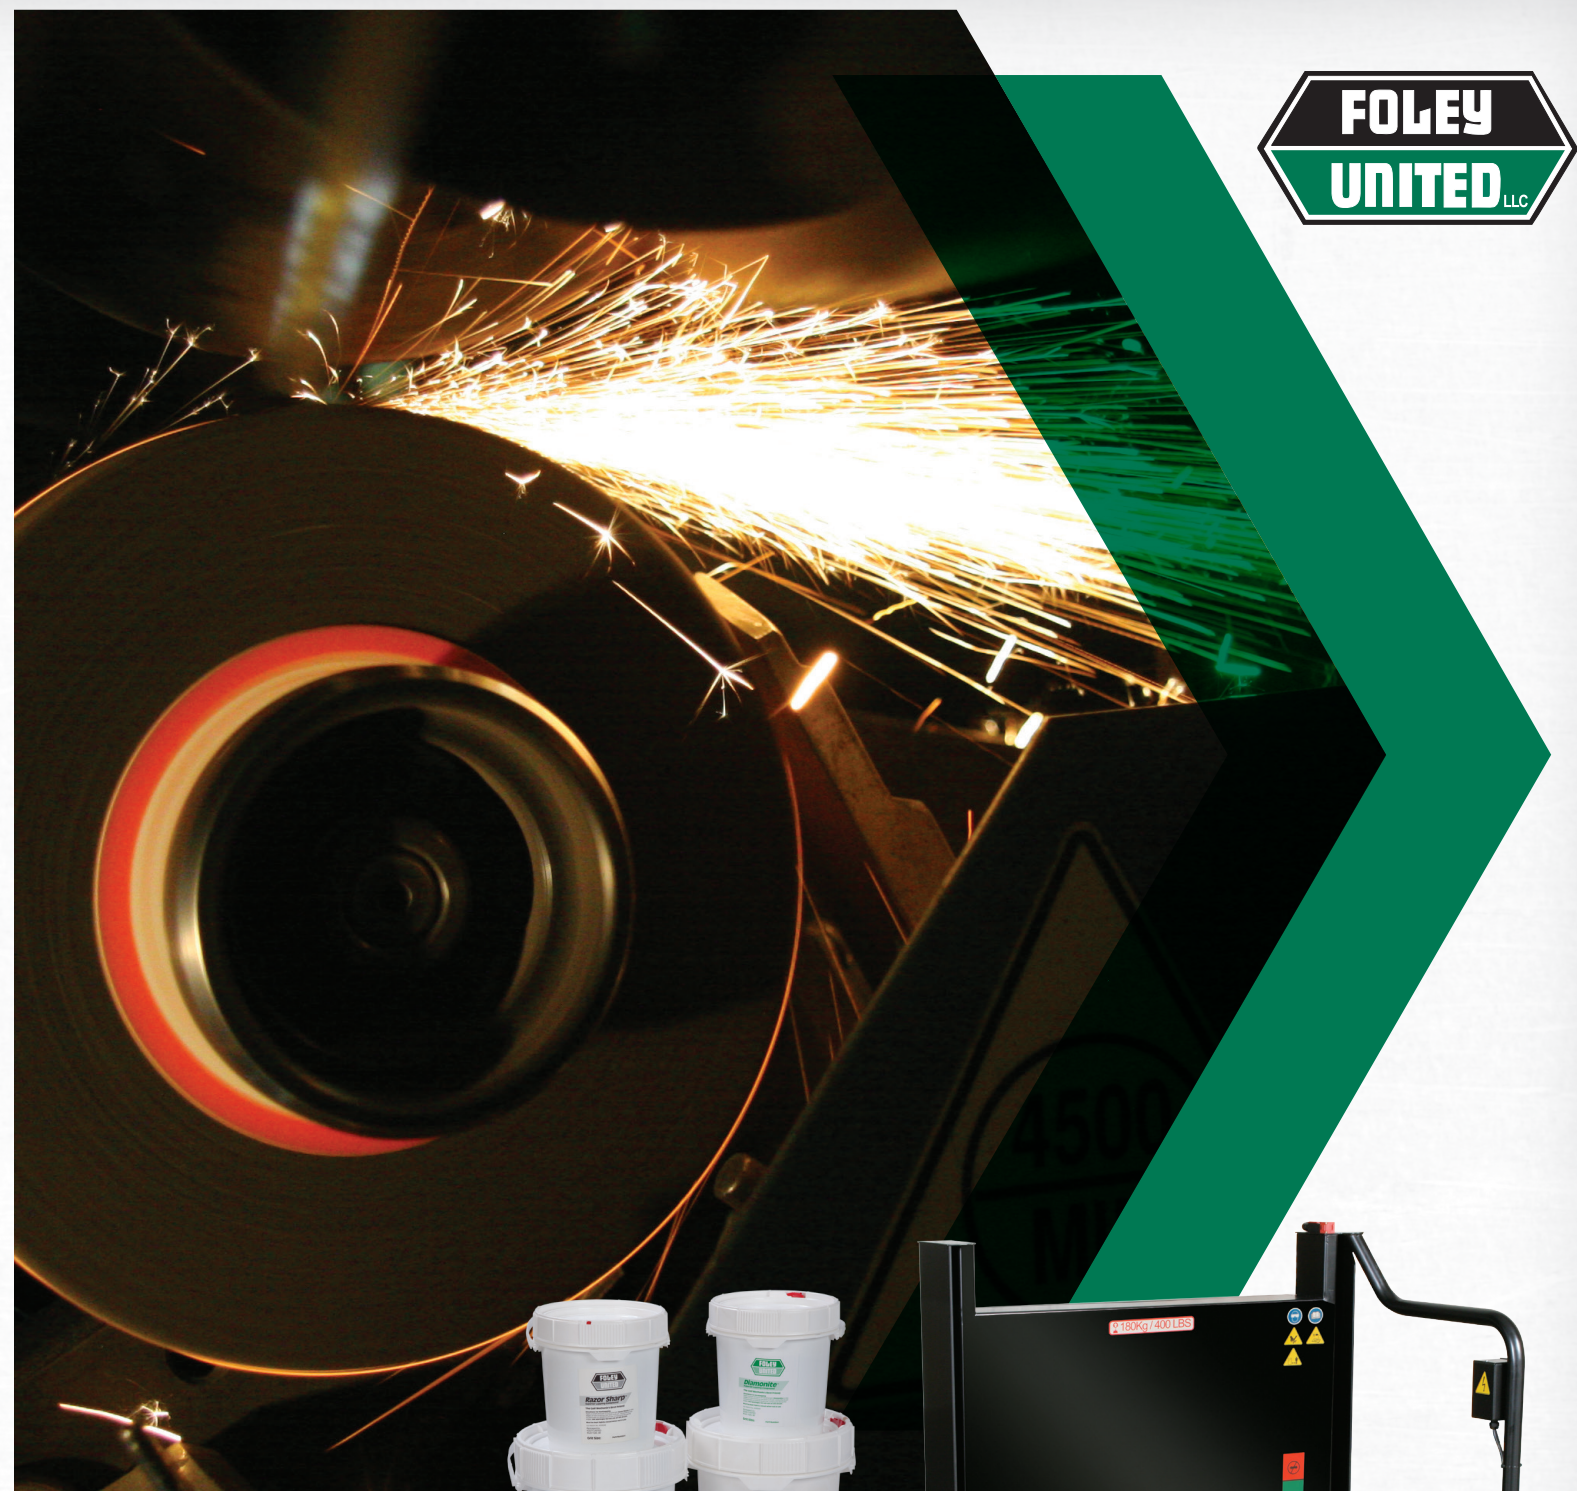

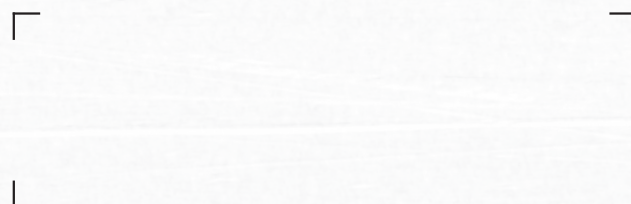

+ FACT: A dull rotary blade can lead to brown and torn grass blades.

PREMIUM ACCESSORIES FOR A BETTER QUALITY OF CUT!

PREMIUM ACCESSORIES

MAKE THEM YOURS!

» The Liftstation

Mountable table-lift is an option for the ACCU-Pro 633 and the ACCU-Spin 622 Series reel grinders. This unit serves as a workbench for shop repairs and as a lift to safely load cutting units into grinding machines.

Features and Specifications

- Heavy-duty all steel construction
- 44.5" (113 cm) wide x 25" (63 cm) deep skid resistant steel lifting platform
- 39.5" (100 cm) working height capability
- 400 lbs. (180 kg) lifting capacity
- Permanently attaches with (8) 3/8" steel bolts
- 115 VAC Power System

+ FACT: One of the leading causes of injury in workplace is a lifting injury.

» The Workstation

Mobile Workstation table-lift is easily moved around the shop on 4" castor wheels. Conduct repairs on engines, trimmers, and other equipment. Unit can also be positioned on the back of the ACCU-Pro 633 and ACCU-Spin 622 Series reel grinders for loading and unloading of cutting units.

Features and Specifications

- Heavy-duty all steel construction for easy maneuvering
- Transport carriage with 4" (10 cm) diameter castor wheels
- 44.5" (113 cm) wide x 25" (63 cm) deep skid resistant steel lifting platform
- 39.5" (100 cm) working height capability
- 400 lbs. (180 kg) lifting capacity
- Anti roll-off mechanism
- Floor stop device to prevent movement once platform has been raised
- Docking feature with reel grinder
- 12V re-chargeable sealed power system

+ FACT: Working when standing is more efficient than kneeling or bending over.

» Lapping Compounds

Available in Razor Sharp (standard grade) and Diamonite (premium) brands. Take the Diamonite challenge today. Diamonite compound dramatically reduces volumes of compound required and improves the speed of honing an edge. With harder reels and bedknives there is a demand for a higher performance compound and Foley United's Diamonite sets the standard.

Available in 10 lbs. and 25 lbs. pails

60 Grit - Fast metal removal for fairway mowers

80 Grit - Regular maintenance of fairway and green mowers

120 Grit - Extra fine finish lapping of green and tee mowers

150 Grit - Diamonite Ultra fine finish lapping of green and tee mowers

+ FACT: Foley United's special processed silica compound can cut up to four times longer than when using other abrasives.

» Grinding Wheels

Grinding wheels are critical for premium performance of Foley United grinders. Each wheel is specially formulated for maximum effectiveness and to Foley United specifications. Don't settle for inferior performance, use only factory original grinding wheels for maximum performance and reliability to maintain a quality grind.

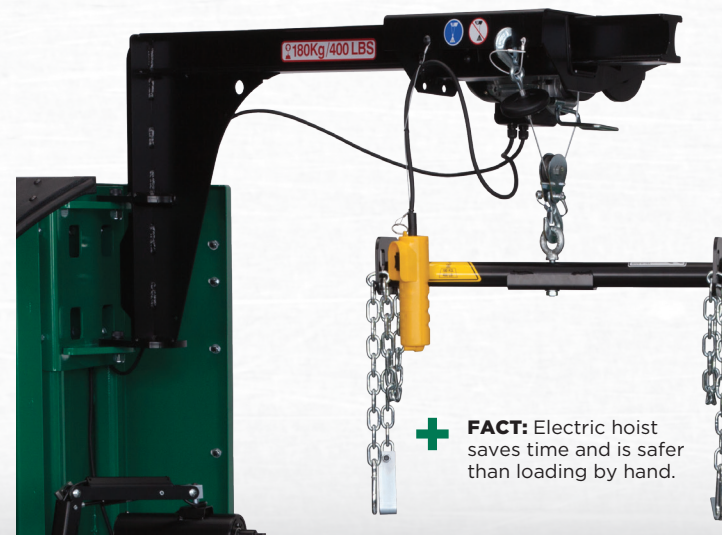

+ FACT: Foley United's Borazon bedknife grinding wheel is a special abrasive designed to improve performance when grinding hardened bedknives lasting much longer than standard ceramic grinding wheels.

» Electric Hoist

Optional universal hoist fits on all of the tabletop style reel grinders—including the 653, 633, and 622 ACCU-Series grinders. This provides a safe and easy way of loading a cutting unit from the front or rear of the 633 and 622 grinders and a front load option for the 653.

Features and Specifications

- Heavy-duty all steel construction
- 400 lbs. (180 kg) lifting capacity
- Hand-held control
- Steel chain and hook loading system
- Easily retrofits to existing grinders

+ FACT: Electric hoist saves time and is safer than loading by hand.
